SUBJECT: Barbados and the Eastern Caribbean: May 2009 NAS Update

-----  
SUMMARY  
-----

¶1. (SBU) The island nations that make up Embassy Bridgetown's area of responsibility - Barbados, Antigua and Barbuda, Dominica, Grenada, St. Kitts and Nevis, St. Lucia, and St. Vincent and the Grenadines continue to see a steady increase in the volume of narcotics destined for and transshipped through the region. As a result of the impact of Plan Colombia and the Merida Initiative, drugs destined for both North American and European markets have begun to flow through the Caribbean at greater levels. Local law enforcement continues to be under-resourced and plagued with antiquated legal codes and corruption in the ranks. Additional resources, to include a functional regional maritime entity, expanded training, and a robust integrity (vetting) program will be required to gain ground and momentum in the fight against narco-traffickers along the U.S. Third Border. Following is a summary of recent law enforcement and counter-narcotics activity and training in Embassy Barbados' AOR. End Summary.

-----
